## <Subject of search>

The invention of claim 2 is specified by the property of "substantially not decomposable even under exposure to, at 780 nm wavelength, 5 mW/cm<sup>2</sup> laser for 200 hr". However, this property is not one commonly employed in the art to which the invention pertains, so that the scope of particular cyanine dyes specified by that property is ambiguous even if the technical common knowledge at the time of filing of this application is taken into account. Consequently, claim 2 cannot be stated as being clearly described within the meaning of PCT Article 6.

Further, claims 1 and 2 cover a vast plurality of compounds. However, only some of the claimed compounds are disclosed within the meaning of PCT Article 5, and within the meaning of PCT Article 6, claims 1 and 2 are not fully supported.

Therefore, the search has been conducted only on the portion supported by and disclosed in the description, namely, "cyanine dyes comprising a compound of the general formula 2 or 3 and an organometallic complex".
